PROFESSIONAL SUMMARY

Full Stack Developer with 3.2 years of professional experience building, enhancing, and deploying production-ready web applications using **React.js, Next.js, Node.js, Express.js, and MongoDB**. Strong expertise in developing responsive, scalable, and user-friendly web applications with **JavaScript, HTML5, CSS3, SCSS, Tailwind CSS, UI/UX and Bootstrap**. Experienced in end-to-end application development, REST API integration, deployment, performance optimization, and production support. Proven ability to collaborate with cross-functional teams, handle development tasks, and contribute to delivering high-quality solutions within project requirements.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap, jQuery

Backend: Node.js, Express.js, REST APIs, MongoDB

Deployment & Hosting: Vercel, Firebase, Hostinger

Development Tools: Git, GitHub, VS Code, Postman

UI/UX & Design: Figma, UI/UX Design, Responsive Web Design

PROFESSIONAL EXPERIENCE

Full Stack Developer

GSUS Star Software Solutions, Rajapalayam **Oct 2024 – Jun 2026**

- Developed and maintained responsive, scalable web applications using React.js, Next.js, Node.js, Express.js, and MongoDB.
- Developed and integrated RESTful APIs with CRUD operations, JWT authentication, authorization, RBAC (Role-Based Access Control), validation, and error handling, while integrating APIs developed using Node.js, Java, and Python in collaboration with backend teams to deliver end-to-end application workflows.
- Integrated Razorpay, POS payment devices, and third-party APIs for secure payment and business workflows.
- Integrated Strapi Headless CMS and developed LLM-powered OpenAI/Generative AI-powered chatbot features.
- Managed application deployment using Firebase, Vercel, Hostinger, GitHub, and private servers, with production support and troubleshooting.

Frontend Developer

Andril Web Technologies **Apr 2023 – Oct 2024**

- Developed responsive B2B, e-commerce, and business websites by translating Figma UI/UX designs into pixel-perfect, reusable, scalable, and user-friendly interfaces.
- Implemented responsive web design and cross-browser compatibility across desktop, tablet, and mobile devices.
- Performed UI testing, debugging, and performance optimization to ensure quality, usability, and consistent user experience.
- Collaborated with UI/UX designers, developers, QA teams, and stakeholders to deliver responsive, scalable, production-ready web applications aligned with business requirements and user experience standards.

KEY PROJECTS

MeatZone – Fresh Meat Delivery & Management Application

Technologies: React.js, SCSS, Firebase, Redux Toolkit, POS Integration

- Developed a full-stack fresh meat ordering and management platform with customer, delivery partner and admin workflows for products, inventory, purchases, and order processing.
- Integrated POS external devices and thermal printers to support offline order processing and automated bill printing.
- Implemented JWT/authentication, RBAC, product and inventory management, stock control, and order management for secure and efficient operations.
- Implemented Firebase integration and Redux Toolkit for real-time data management, global state management, and scalable application workflows.
- Managed production deployment, application performance optimization, product/stock configuration, and operational settings for a reliable production environment.

Zenthi – Wellness Management Application | US Client Project

Technologies: React.js, Vite, SCSS, Redux Toolkit, Razorpay, AI Chatbot, Third-Party APIs

- Developed a scalable wellness management web application for a US-based client with user and admin workflows.
- Implemented RBAC, authentication, authorization, and admin panel access control for secure role-based operations.
- Integrated Razorpay, third-party APIs, and real-time AI-powered chatbot functionality.
- Implemented Redux Toolkit and global state management for complex workflows and high-volume user interactions.

Service Connect – Automotive Service Platform

Technologies: React.js, Vite, SCSS, Redux, Bootstrap, Headless CMS, Payment APIs, AI Chatbot

- Developed a responsive automotive service platform for web and Android users, supporting service discovery and customer workflows.
- Built reusable React components and scalable frontend architecture using Vite, SCSS, Bootstrap, and Redux.
- Converted Figma UI/UX designs into high-fidelity, responsive interfaces with consistent layouts across desktop, tablet, and mobile devices.
- Integrated payment APIs, Strapi Headless CMS, and real-time AI-powered chatbot functionality for dynamic content and customer interactions.

EDUCATION

Master of Computer Applications (MCA) **2026/ 2028**
Alagappa University, Karaikudi | Distance Education

Bachelor of Science (B.Sc.) — Mathematics **2017-2020**
Sacred Heart College of Arts and Science, Dindigul.

AWARDS & RECOGNITION

Best Developer Award | GSUS

- Recognized for technical excellence, hardwork, outstanding contribution, and team collaboration.
- Contributed to company branding and promotional video initiatives.
